

# Authority should exist only for the transaction

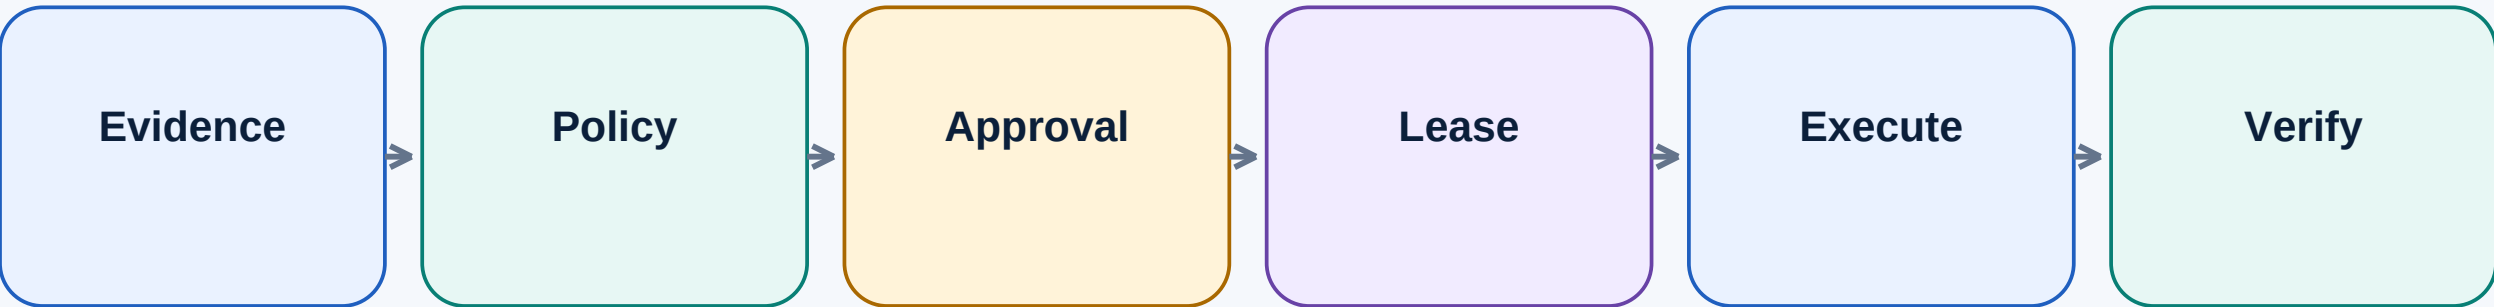

The same CRM update can have radically different loss surfaces.

## THE OPERATING NUMBER

100% -> 0.35%

Modeled reachable authority after scope, value, time and use constraints

## CONTROL PATH

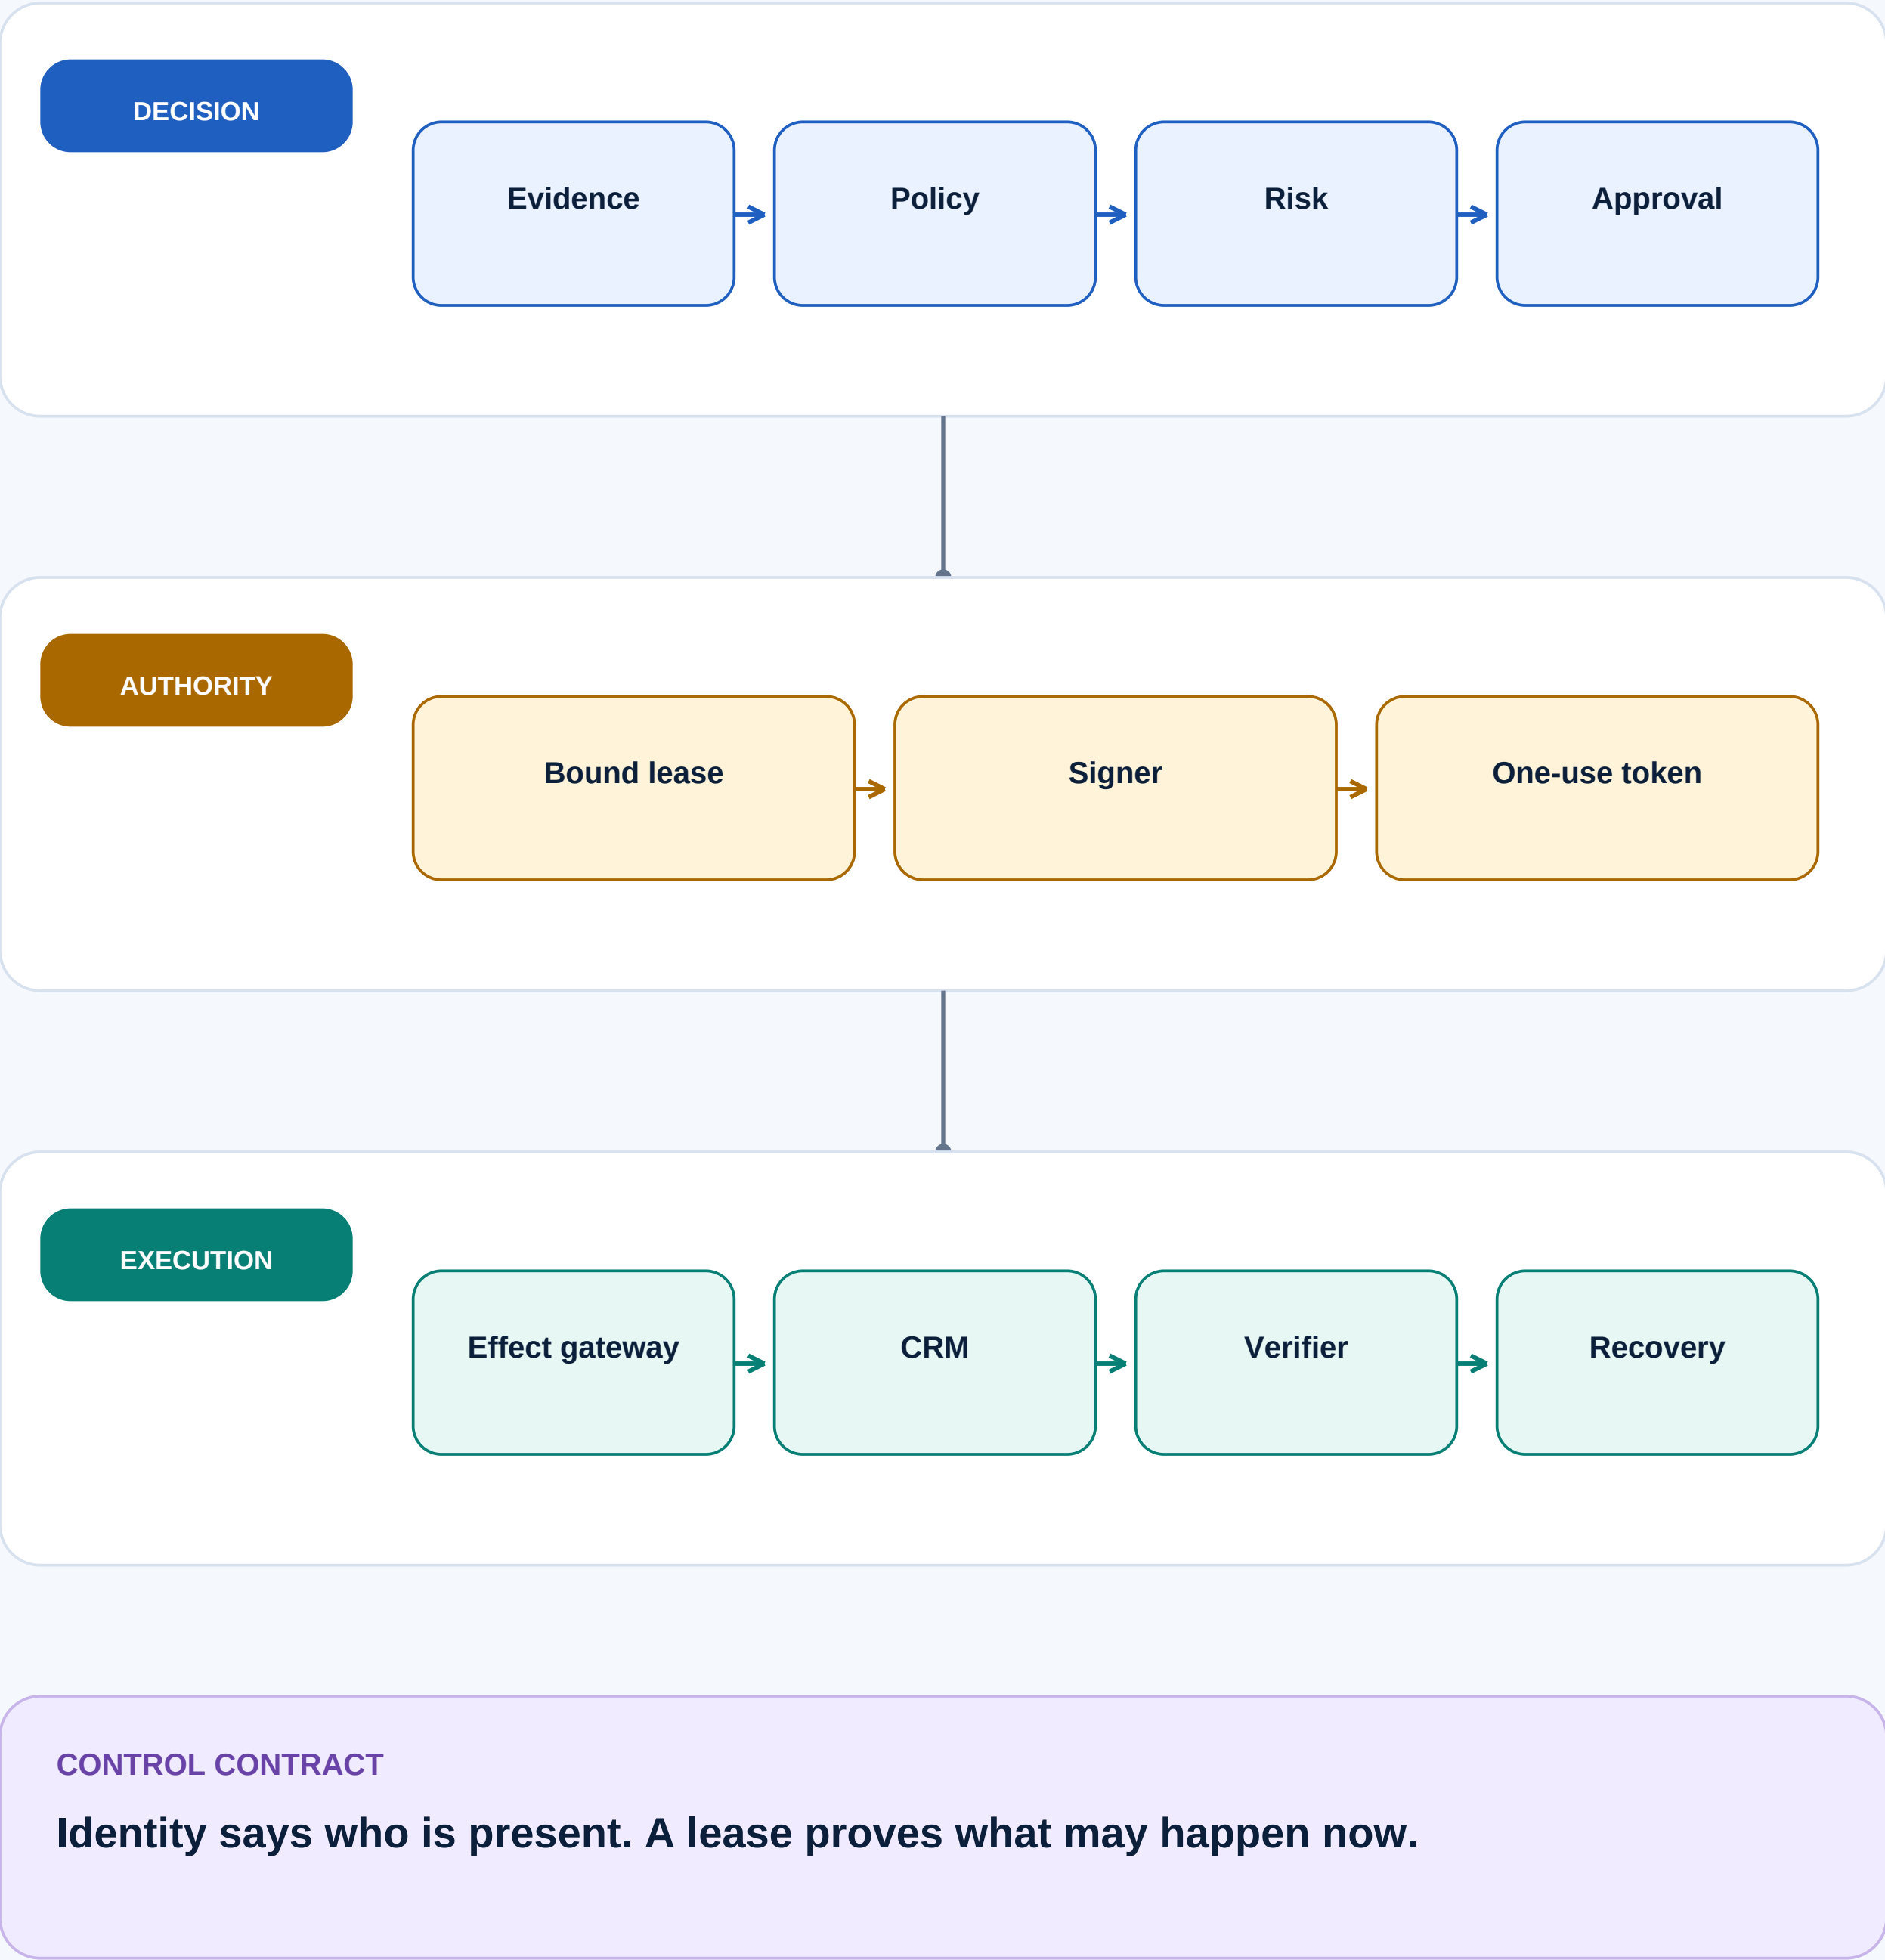

## DESIGN PRINCIPLE

Identity says who is present. A lease proves what may happen now.

# Permission Leases control architecture

Explicit planes separate decision, authority, execution and proof.

# The lease is narrow; the control path stays complete
