

Memory needs freshness and deletion SLOs

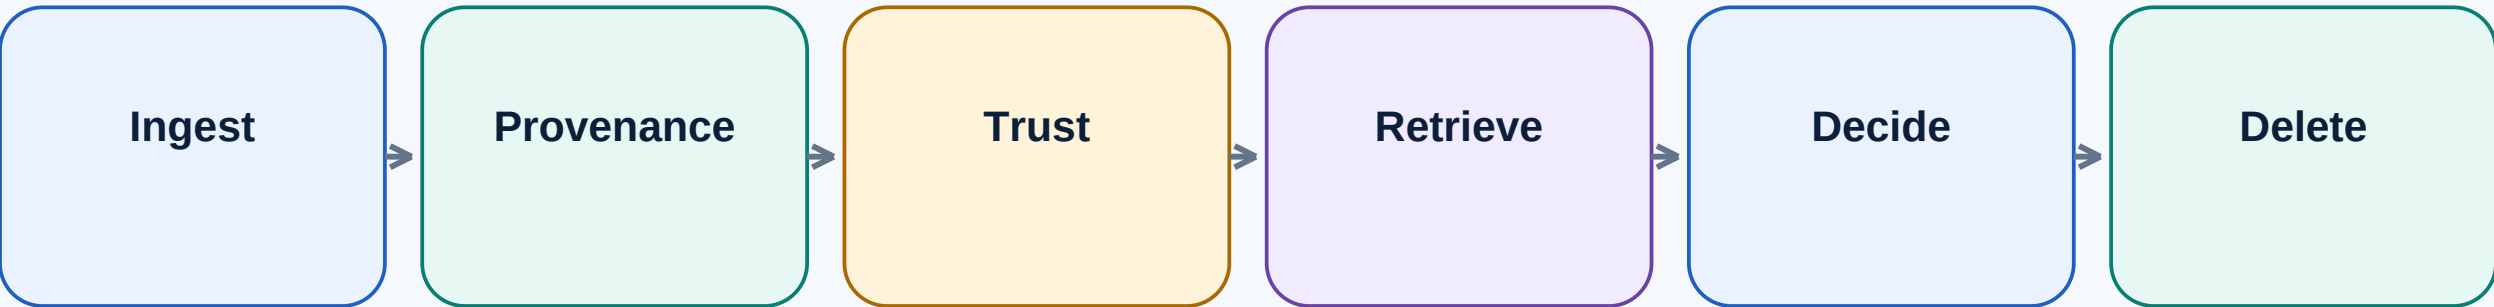

Fast retrieval says nothing about truth, permission or reversibility.

THE OPERATING NUMBER

104 ms + 31 h

Retrieval passes while deletion p99 breaches the 24-hour objective

CONTROL PATH

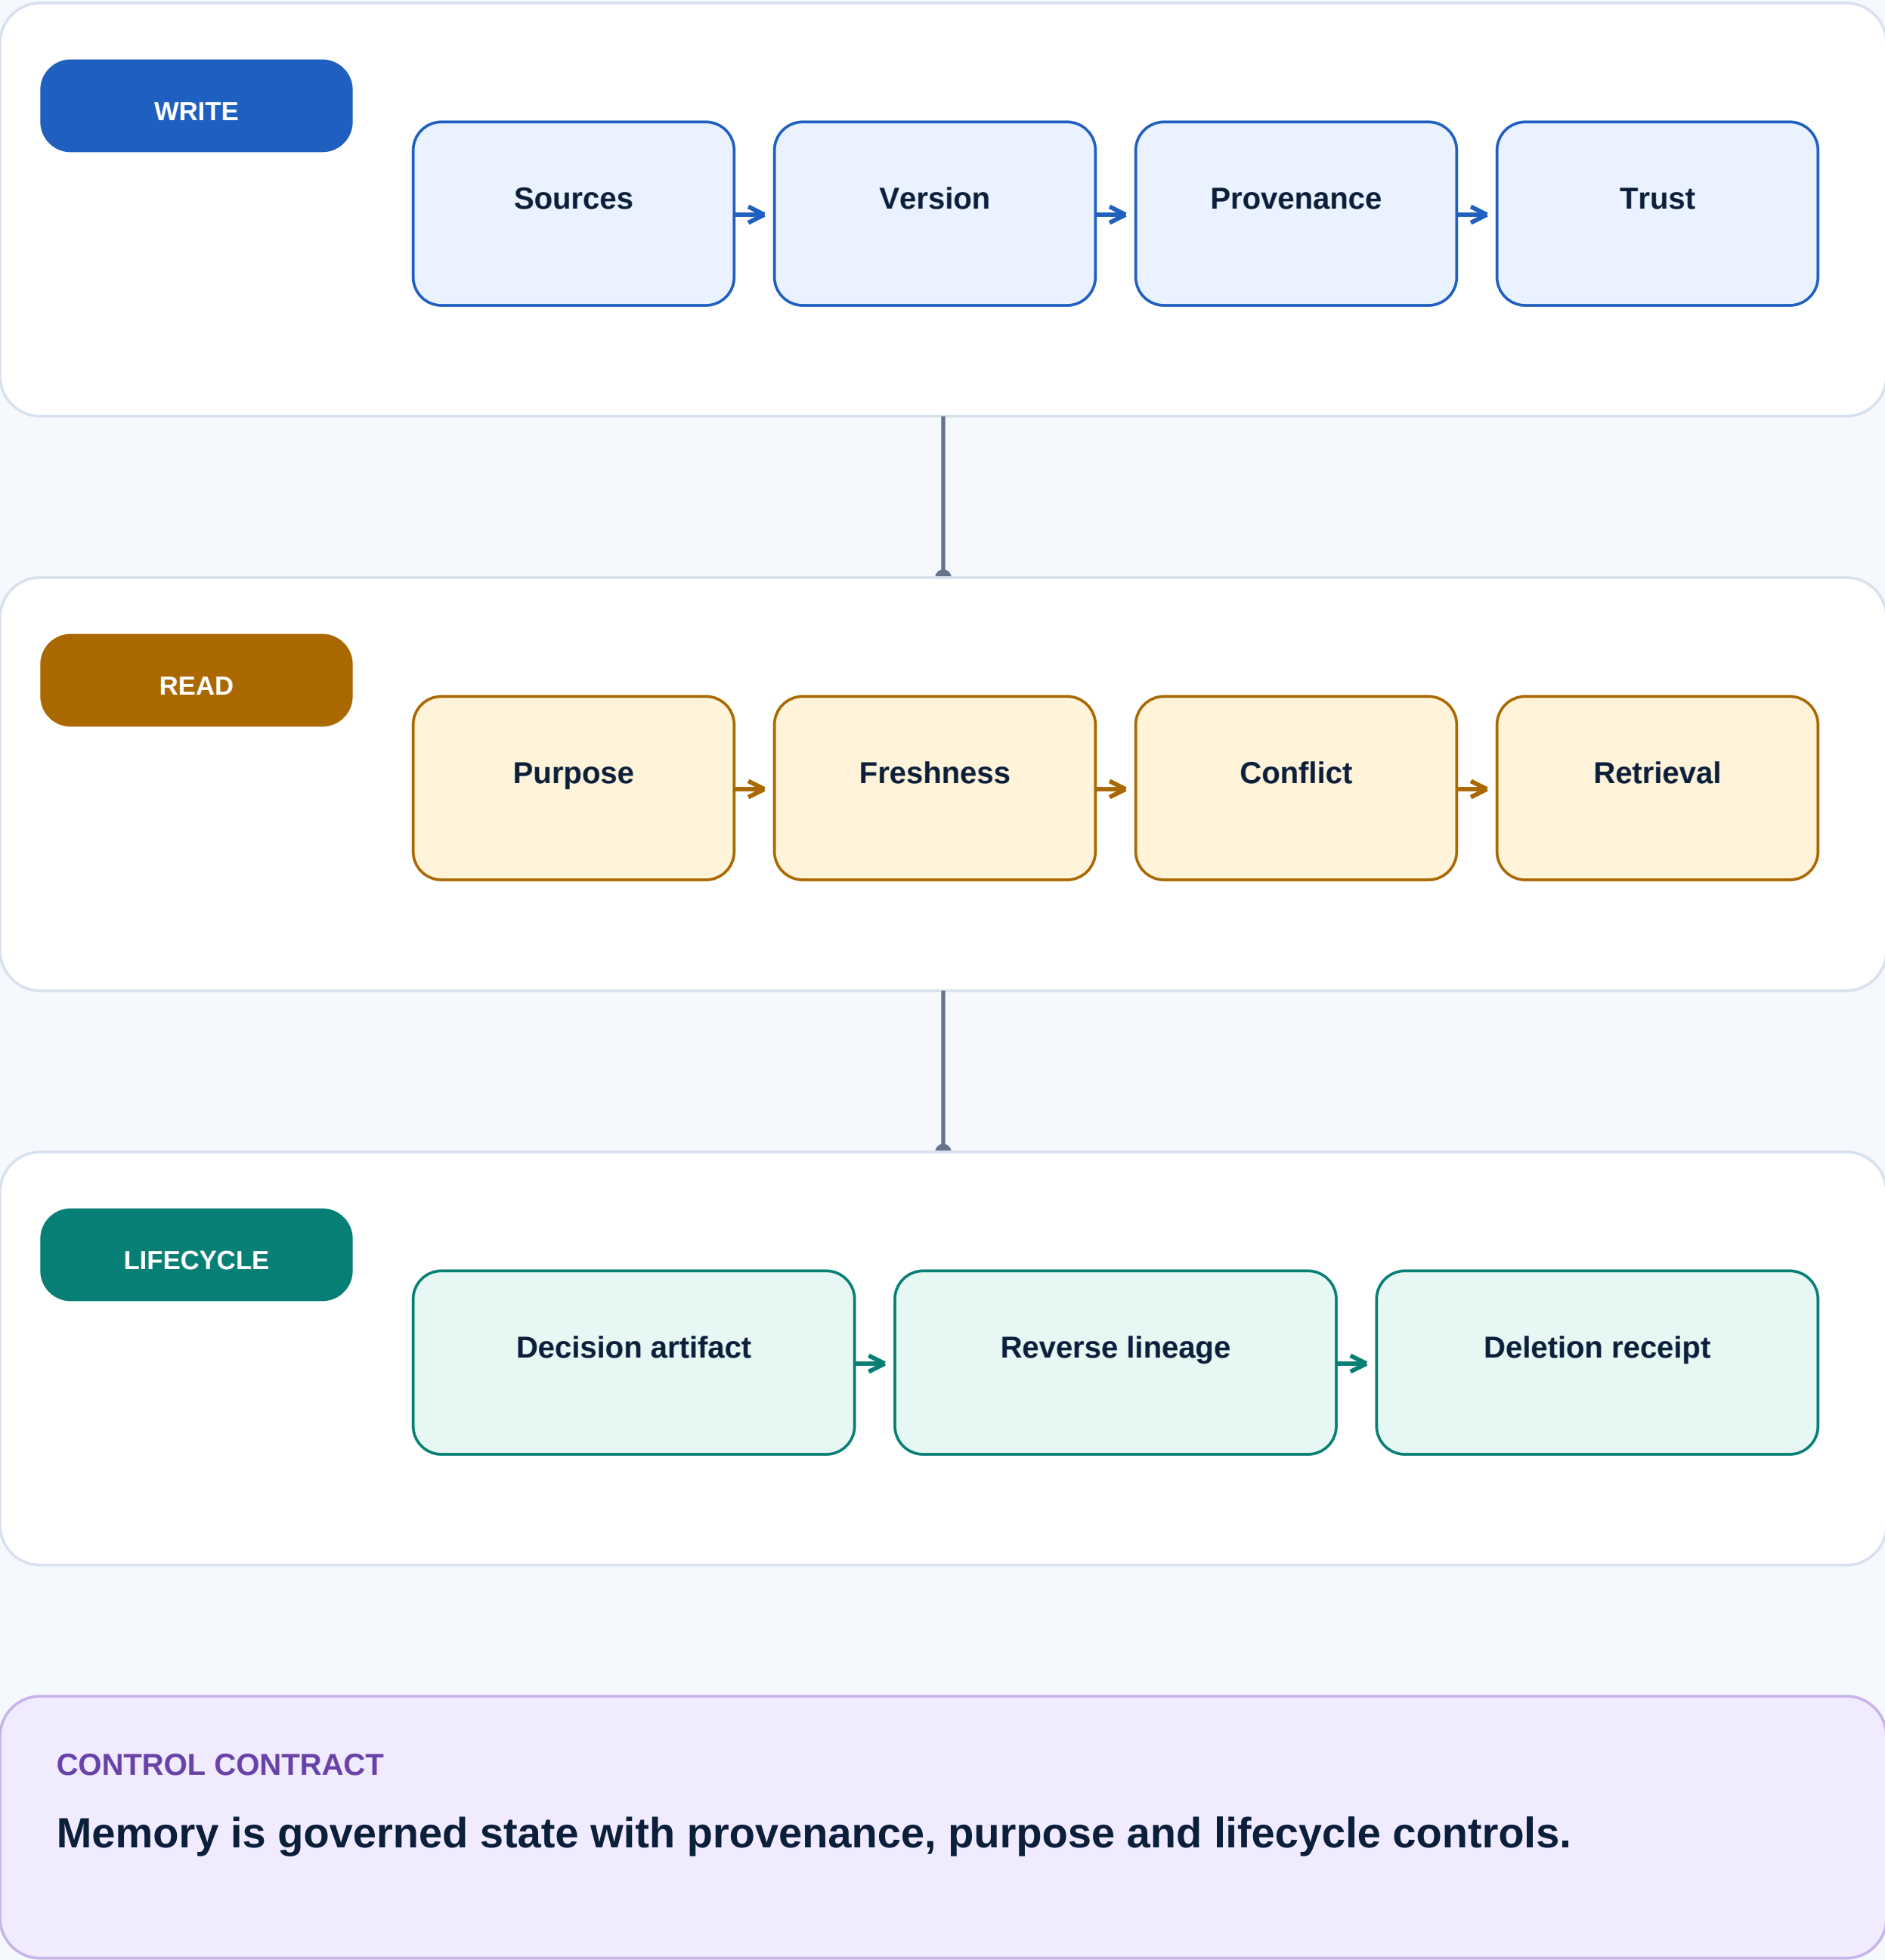

DESIGN PRINCIPLE

Memory is governed state with provenance, purpose and lifecycle controls.

Agent Memory control architecture

Explicit planes separate decision, authority, execution and proof.

One freshness threshold cannot govern every memory class

Six-hour prices and 180-day contract terms decay on different clocks

CLASS

6 h

Price half-life

CLASS

24 h

Case status

CLASS

7 d

Account risk

CLASS

180 d

Contract term

BREACH

1

Poison admission

BREACH > 24

31 h

Deletion p99

DECISION RULE

Retrieve only assertions that are current, attributable, permitted and conflict-resolved.
